CSS overflow

- visible:The overflow is not clipped. It renders outside the element's box.This is default.
  overflow:visible;

- hidden:The overflow is clipped, and the rest of the content will be invisible. Content can be scrolled programmatically (e.g. by setting scrollLeft or scrollTo())
  overflow:hidden;

- clip:The overflow is clipped, and the rest of the content will be invisible.Forbids scrolling, including programmatic scrolling.
  overflow:clip;

- scroll:The overflow is clipped, but a scroll-bar is added to see the rest ofthe content
  overflow:scroll;

- auto:If overflow is clipped, a scroll-bar should be added to see the rest ofthe content
  overflow:auto;

- initial:Sets this property to its default value. Read about initial
- inherit:Inherits this property from its parent element. Read about inherit
